

TASHKENT, UZBEKISTAN

WHO I AM

Neurologist, researcher, and founder

My name is Abubakr Yernazarov. I am a practicing neurologist and third-year master's student in the Department of Neurology in Tashkent, Uzbekistan. I also live with a disability — which means I understand inaccessibility not as a policy problem, but as something I navigate personally every day.

In 2024, I founded NeyroYo'l (Uzbek for "neuro path") — a mobile neurodiagnostics service built around a simple principle: if the patient cannot come to the clinic, the clinic must come to the patient.

Unlike standard mobile EEG providers who send technicians, I perform every session myself as a licensed neurologist. I interpret results on the spot, explain the diagnosis and its clinical implications to families in plain language, and connect patients with the right specialists — neuropsychologists, speech therapists, rehabilitation teams. One visit. Complete care.

LOCATION

Tashkent & Tashkent Region, Uzbekistan

SPECIALTY

Neurology — Pediatric & Adult

EDUCATION

Master's in Neurology (Year 3)

LANGUAGES

Uzbek, Russian, English

WHAT WE DO

Full neurological care, wherever you are

NeyroYo'l operates across Tashkent city and the Tashkent region — visiting family homes, and traveling to hospital wards that lack diagnostic equipment.

Home-Visit EEG

Portable EEG for children with autism, cerebral palsy, and epilepsy in the comfort and safety of their own home — where they can actually cooperate.

Bedside EEG

EEG for comatose and critically ill patients in public and private hospitals that have no EEG device on-site. Available at any hour.

On-Site Consultation

Every session includes a full neurological consultation — diagnosis interpretation, pathogenesis explained in plain language, and referrals to the right specialists.

WHY NEYROYO'L

Not just faster — fundamentally different

Other mobile EEG services exist. Here is what makes NeyroYo'l different.

STANDARD MOBILE EEG

- ✗ Student or technician performs the procedure
- ✗ No consultation — results sent later
- ✗ Travel costs charged separately

- ✗ No specialist referrals provided
- ✗ Often unavailable on weekends
- ✗ Fixed pricing regardless of family income

NEYROYO'L

- ✓ Licensed neurologist performs every session
- ✓ Full consultation on the spot — diagnosis explained to family
- ✓ All-inclusive pricing, no hidden travel costs
- ✓ Referrals to neuropsychologists, speech therapists & more
- ✓ 24/7 including nights, weekends & holidays
- ✓ Free for families who cannot pay
